# Her Etch A Sketch art makes us question what we've done with our lives

**'Etch A Sketch Princess' produces amazing art on classic childhood toy**

Jane Labowitch and her rendition of Georges Seurat's 'A Sunday on La Grande Jatte'

LENNY GILMORE/REDEYE

By Rianne Coale | REDEYE

**M**any people are lucky if they can make a straight line on an Etch A Sketch, but Chicago native Jane Labowitch puts us all to shame.

The 24-year-old Horner Park resident and self-proclaimed Princess Etch A Sketch recently completed her re-creation of Georges Seurat's "A Sunday on La Grande Jatte" on the popular childhood toy. It took eight hours over four sittings at the Art Institute to create. No Photoshop trickery, either. I saw it with my own two eyes.

The fact that Seurat's painting was created using pointillism intrigued Labowitch because she said you wouldn't expect to see it on an Etch A Sketch. (I don't think anyone would expect to see more than a few rectangles, to be honest.) But because the details of the painting are all connected, she was able to pull off the challenging yet amazing feat.

"I've always been a fan of this painting," said Labowitch, who has a bachelor's in illus-

tration from the American Academy of Art in Chicago. "It's always been one of my favorites at the Art Institute, and I've done some master copies before of other famous paintings, but I've never done them in person. I really liked the idea of getting out of the office and working from the real thing."

If you're not familiar, everything in an Etch A Sketch artwork is connected, with one continuous line morphed into different shapes with two dials. Crazy, I know.

That said, Labowitch had to pay really close attention to the painting's details and proportions to render it onto the Etch A Sketch. And she took her time because she couldn't really erase any mistakes without having to erase the whole piece.

"There are ways to cover up certain mistakes. If it's a small mistake, I can figure out a way to mask it. If it's a medium mistake, I might be able to come up with a solution," Labowitch said. "But if the mistake is too big, there's a way to erase part of the drawing

if you kind of hit it the right way, but no pun intended, it's hit or miss."

"If the mistake is horrendous, I would just shake and erase the whole thing and start over. There is actually a small portion of [the rendering] that I couldn't fit on the screen, but I committed to it. At that point, sometimes done is better than perfect."

As of now the artwork is not yet preserved, so one fatal jerk and all that work could be erased.

Currently a photo re-toucher, Labowitch plans to quit her job soon to pursue Etch A Sketch and freelance art full time. In her words, she's just "running with it." She'll literally be making a living doodling on a toy. Luckyyy.

She said a circle is the hardest thing to draw on an Etch A Sketch, but once you've mastered that, the rest is rather easy (suuuure).

Want one of your own? You can find Labowitch on Etsy, where you can order pre-designed or custom Etch A Sketch artwork.

—Jane Labowitch

Fun fact: Disney has purchased Etch A Sketch artwork from Labowitch, though she wasn't able to disclose the price the company paid for her work. She did say that some of her other commissions have fetched her more than \$1,000.

Shake it 'til you make it, girl.

## Illinois Tech launches Saturday MBA program focused on innovation

By **Ally Marotti** | FOR BLUE SKY INNOVATION

The Illinois Institute of Technology is launching a two-year Saturday MBA program this fall, teaming with the Chicago Innovation Awards to add a twist.

The first class will have about 30 students and start classes in August, said Krishna Erramilli, associate dean at Illinois Tech's Stuart School of Business and program director of the new accelerated MBA.

In addition to finance, marketing and other traditional subject matter, students in the new program will focus on innovation and entrepreneurship. They will learn to create new business strategies that will give them a leg up in a world that's being constantly altered by technology, Erramilli said.

"We need to develop new business models, new management practices in order to compete and be successful in a world dominated by rapid technology change, big data analytics and globalization," he said.

The curriculum will also push real-world experiences. Students will become members of Chicago Innovation Awards, which typi-

cally costs \$250 a year, said Tom Kuczmariski, co-founder of Chicago Innovation Awards.

The for-profit company, founded in 2002, hosts a yearly award ceremony and events throughout the year that connect the business, tech and innovation communities.

Students will be "learning by doing and learning by seeing and learning by talking with other people that have done it," Kuczmariski said.

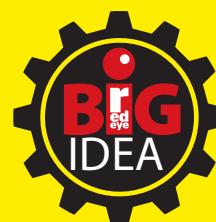

That might ultimately help Chicago retain the talent, he thinks.

"The more we can get students embedded in our community, the higher probability there is for them to stay here," he said.

Classes will be held at Illinois Tech's West Loop campus at 565 W. Adams St. Tuition for the whole program is \$50,400, Erramilli said. Illinois Tech also

offers a full-time MBA program that takes two years to complete.

Illinois Tech is offering \$10,000 scholarships for the new program as well. Chicago Innovation Awards officials will help select the recipients. Erramilli said up to 15 students could receive scholarships in the first class.

## AVOID BACK SURGERY! Amazing Technology Could Relieve Serious Back Pain.

# COULD THIS GET RID OF SCIATICA, BULGING DISCS, AND LEG PAIN ONCE AND FOR ALL?

### Do You Have Any of the Following Conditions?

- Sharp Pains in the Back of the Leg
- Lower Back Pain
- Herniated/Bulging Discs
- Numbness in Your Arms or Legs
- Shooting Hip or Thigh Pain
- Muscle Spasm, Sprains & Strains

If you've suffered from any of these annoying conditions, you may have "Sciatica".

Sciatica is a compression of the sciatic nerve, usually by an L4 or L5 disc herniations. As you know, sciatica can be a very painful problem, even crippling at times.

Nothing's worse than feeling great mentally, but physically feeling held back from life because your back or sciatica hurts and the pain just won't go away!

Fortunately, if you are suffering from any of these problems, they may be relieved or eliminated by non-surgical spinal decompression combined with cold laser therapy.

### "What's The Chance This Will Work For Me?"

A medical study found patients went from moderately painful to almost no pain with decompression treatments. Those that took pain pills improved less than 5%. – Am Society of Anesthesiologist, 2006 Chicago, IL

Another study presented at the American Academy of Pain Management in 2007 showed...

*"Patients reported a mean 88.9% improvement in back pain and better function... No patient required any invasive therapies (e.g. epidural injections, surgery)."*

These are just two studies out of a dozen done in the last few years, all showing promising results.

### Finally, You Have An Option Other Than Drugs or Surgery

New research in a treatment called low level laser therapy, or cold laser, is having a profound effect on patients suffering with pain. This pain-free, non-surgical approach works by stimulating the body's natural healing processes, providing pain relief and reducing injury damage.

This leading edge technology has an impressive success rate of returning patients to work, sports and competitive activities, as well as everyday life.

Patients treated with cold laser therapy often show a higher level of function, both during and after the treat-

ment period. The therapeutic laser provides a tremendous alternative for those facing surgery.

Here's the point of all these studies... spinal decompression combined with cold laser therapy has a high success rate with helping disc herniations, sciatica, and back pain.

This means in just a matter of weeks you could be back on the golf course, enjoying your love life, or traveling again.

### M.R.I WARNING:

- ✓ Were Your Results FULLY Explained?
- ✓ Were You Provided Treatment OPTIONS?
- ✓ Were You Provided SECOND OPINIONS?

### The Single Most Important Solution To Your Sciatica and Back Pain

It's time for you to find out if these treatments will be your sciatic pain solution. **For 10 days only**, \$35 will get you all the services I normally charge new patients \$250 for! What does this offer include? Everything. Here's what you'll get...

- An in-depth consultation about your health and well-being where I will listen...really listen...to the details of your case.
- A complete neuromuscular examination.
- A thorough analysis of your exam findings so we can start mapping out your plan to being pain-free.
- You'll get to see everything first hand and find out if this amazing treatment will be your pain solution, like it has been for so many other patients.

I'll answer all your most probing question about our pain-free sciatica and back pain evaluation and what it can do for you.

The appointment will not take long at all and you won't be sitting in a waiting room all day either.

And the best part about it is...

### No Dangerous Drugs, No Invasive Procedures, and No Painful Exercises

These treatments are very gentle. In fact, I even catch a few patients sleeping during sessions every once and awhile.

### "But I feel fine – as long as I take my pain pills."

There's a time to use pain medications, BUT not before seeking a natural way to correct the CAUSE of the problem!

Spinal Decompression combined with Cold laser therapy just may be the answer that you've been looking for. Ask yourself ... after taking all these pain medications and playing the 'wait and see game', maybe for years...are you any better off?

Call and tell the receptionist you'd like to come in for the Special Decompression & Laser Evaluation.

Call 773-725-5835 today, and we can get started with your consultation and exam as soon as there's an opening in the schedule.

**Our office is called Taylor Rehabilitation and Wellness Center and you can find us at 4956 W Irving Park Road, Suite 200, Chicago.**

I look forward to helping you get rid of your pain so you can start living a healthier, more joyful life.

Sincerely,  
**Michael Taylor, DC**

We Accept  
Primary Insurances  
& Even Work and  
Auto Accidents

**P.S. The only real question to ask yourself is this...**

### What Will Your Pain Feel Like 1 Month From Today?

One of the biggest myths about pain is that it goes away all by itself, without any treatment.

A May 1998 study in the British Medical Journal proved this myth false, showing that 75% of back pain sufferers who do nothing about it will have either pain or disability 12 months later.

Let's face it, if the pain hasn't gone away by now, it's not likely to disappear on its own.

Life's too short to live in pain like this. Call today 773-725-5835 and soon I'll be giving you the green light to have fun again.

### Here is What One of Our Patients Had to Say...

**"(This is) my second time needing treatment with Dr. Taylor and I feel almost 100% better. I have had great response to the care he has been giving me over the past 3 months. Isabel, Margaret and Susie are awesome massage therapists and have been spot on each time they have cared for me. The reception staff is always very professional, friendly, and helpful. Overall, awesome practice!" – Jennifer D.**

A quick trip through the evolution of CTA rail cars

By Phil Geib and Ryan Marx | CHICAGO TRIBUNE GRAPHICS

The CTA's next generation of rail cars will include a mix of forward-facing and aisle-facing seats, a pretty quick departure from the unpopular aisle-facing seats on the 5000 series. The \$1.3 billion project, approved in March, will replace half of the CTA's train fleet with newer 7000 series cars to be built over 10 years. The first cars will hit the rails in 2019. Since wooden train cars of the early 1890s, about a dozen different series of cars have traveled on the "L," an over-120-year evolution in the experiences of commuters. Here are highlights.

3200 Series

After a brief hiatus, hopper windows were again included in the design. These are the first cars to adopt LED destination signs. As ridership increases, seating is sacrificed to make more standing room. A few of the cars had all seats removed and were labeled "MAX." The trial proved unpopular with riders and caused weight distribution problems on the train.

These cars feature the unpopular aisle-facing seating. New features also include LED lights inside and out, seven interior security cameras, onboard event recorder (i.e. black box), interior system maps with location indicator lights, chimes when the doors open and glow-in-the-dark floor markings.

# WHEN BASEBALL'S NOT ON...

## YOU MIGHT WANT TO PAY ATTENTION TO CERTAIN PLAYOFF GAMES

**Tim Coffey**

redeye@redeye.com  
@tqcoff

With all the discussion about how the Cubs and White Sox are about to clinch the pennants in their respective leagues, it's easy to forget that the Cubs and White Sox are not about to clinch the pennants in their respective leagues.

The season is off to

a great start on both sides of the city and the level of excitement is warranted, but you understandably may have forgotten that two major sports are in the thick of postseason action. With Blackhawks and Bulls fans unburdened by a championship

chase this year, most hockey and basketball followers in Chicago have rightfully given their undivided attention to baseball. For those of you who remain on the fence about watching the remainder of the NHL and/or NBA playoffs, I've done you a kindness by providing completely objective recommendations. You're very welcome.

### NHL The bad

I'm not kidding when I tell you NHL playoff games are routinely outperformed in the ratings by three consecutive late-night reruns of "The Big Bang Theory" on the Adult Swim network. That is outstanding news for "The Big Bang Theory." Less encouraging for hockey, though.

### The good

The Stanley Cup Playoffs feature closely contested series with the game's biggest stars going head to head. But that's probably

a moot point for most because it's nearly impossible to find these games on TV. And if you can't find it on TV, that's a good indicator that it's not worth watching.

Good luck trying to keep up with an entire series when Game 1 is on C-Span, Game 2 is on Nickelodeon and then it doesn't even matter what channel Game 3 is on because by then you're content watching an hour and a half of old "Big Bang Theory" episodes.

### Recommendation

Don't watch. I'd tell you to opt instead for late-night syndicated television, but it sounds like you're already doing that.

### NBA The bad

You'd think it's a good thing when I tell you I see only like two different commercials when watching an NBA playoff game from start to finish. But it's not so good when you consider that there are dozens of commer-

cial slots. Once you've seen the "Meet the Hoopers" and "The Andersons got tickets to the game?" commercials 10 times before the first quarter is over, you start hoping for a Hatfield-McCoy-type situation to develop between the two fictional families.

### The good

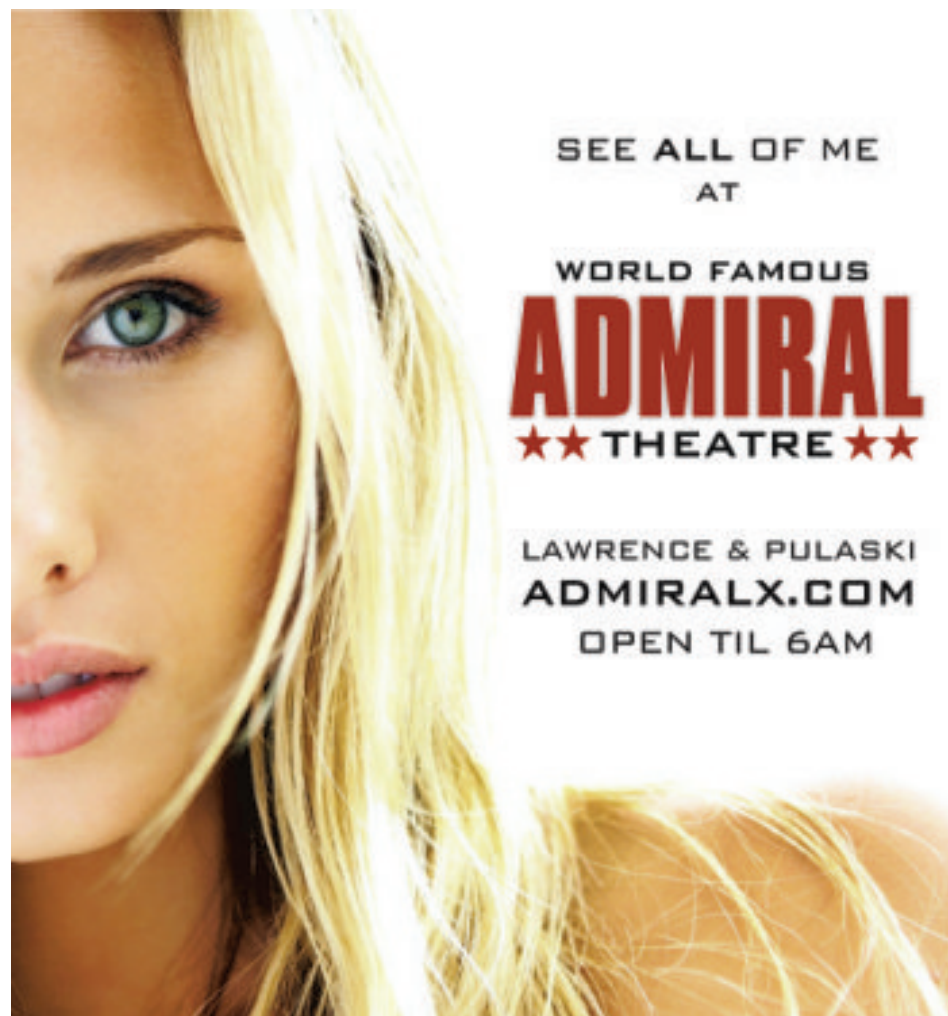

This year's edition of the NBA playoffs has been highly watchable, with the remaining matchups neck and neck. This postseason is packed with star power and explosive offenses, and you don't need to have a team in the race to appreciate some of the greatest athletes in the world dunking in each other's faces and trading 30-foot bombs. If that's not your thing, I'm sure you'll find your way over to "The Big Bang Theory" or playoff hockey. Well, probably not the latter.

### Recommendation

Watch.

## THE QUOTE

“WHEN YOU’RE ON THE OUTSIDE LOOKING IN, FOR YEARS, FOR DECADES, ONLY A FOOL MISPLAYS IT ONCE HE’S GIVEN A WINNING HAND. AND ASIDE FROM CERTAIN DEVASTATING GENETIC WEAKNESSES, I AM NOT A FOOL.”

—Robert Downey Jr., to GQ Style, about his success and how he looks at roles he takes on with a keen eye. Downey Jr. also said, “But life is short, and ultimately I’m in a service industry. As much as I exist to do anything else, I exist to create widgets of entertainment for other people to consume.”

## Another Ryan Gosling-Eva Mendes baby

Ryan Gosling and Eva Mendes have welcomed their second child to the world, and we didn’t realize the due date was so close to the birth announcement. According to **people.com**, Mendes gave birth to the couple’s second baby girl, Amada Lee Gosling, at the end of April. They didn’t announce the pregnancy until last month. Their older daughter, Esmeralda Amada, was born in 2014.

## HOT DATE

## JULY 21, 2017

It looks like we’re getting “Pitch Perfect 3” a little earlier. According to **ew.com**, the release date for the third installment of the a cappella movie series has been moved up two weeks. This returns the film to its original release date after it was bumped back to Aug. 4 several months ago. Anna Kendrick and Rebel Wilson are returning for the film.

### ‘It has to be right’

Tim Burton has heard you, and he wants to let you know that he’s interested in a “Beetlejuice” sequel. But in an interview with Collider, Burton said, “It’s something that I really would like to do in the right circumstances, but it’s one of those films where it has to be right. It’s not a kind of a movie that cries out [for a sequel], it’s not the Beetlejuice trilogy. So it’s something that if the elements are right—because I do love the character, and Michael [Keaton]’s amazing as that character, so yeah, we’ll see. But there’s nothing concrete yet.” We’re pretty sure if we say Beetlejuice three times, the sequel will just appear anyway.

## Prince runs the show

When Prince appeared on “New Girl” in 2014, he had one simple request: No [bleep]ing Kardashians. According to **ew.com**, Zooey Deschanel told Conan O’Brien on “Conan” on Monday night that Khloe Kardashian and Kris Jenner came to set for a scene at Prince’s house in the episode. Deschanel said that as she was studying her lines for the episode, a PA came in and took all of the scripts and call sheets and burned them. Deschanel added, “It turns out that someone from Prince’s camp said, ‘Who are the celebrities? I hope it’s not a Kardashian.’” She said that she felt bad, but “Prince was running the show.”
